HOWIE ATTACKS SHOLTZ AS TOOL OF CORPORATION

Republican Candidate Says 'Secret Five' Runs Dem- ocratic Party

Appeal To Local Prejudice In Reference To Land In Belgium

Political history in the Everglades was made Tuesday afternoon when 200 persons assembled on the grounds of the Pahokee high school listened sympathetically to speeches by W. J. Howie, Republican candidate for governor, and G. H. Martin of Fort Lauderdale candidate for state senator, and W. H. Marshall, once elected to the

Florida legislature as a Democrat
and now an active Republican.

In the opinion of competent observers, Howie is not a good political speaker, he is not a good speaker by any standard, his statements were wild and his arguments contradictory and his conclusions illogical—but he made a convincing case and made converts among Democrats and Republicans to their party has been weakened by the conduct of state and county affairs on the one hand and the persuasions of the tariff advocates on the other.

Frank A. Huston of West Palm Beach, chairman of the Republican county executive committee, presided and introduced the speakers.

At 15 and 20 other east coast Republican clubs, the speakers

and met Mr. Howie and after the Pahokee meeting they escorted him to West Palm Beach where a banquet complimentary to the Republican candidate for governor was given Tuesday night at the Elks Club.

Mr. Howie is a more elderly man than was supposed by persons who had not seen him: the fringe of

gray hair around his temples indicates that he is 10 or 15 years older than his campaign pictures suggest.

Opening his speech his first reference was to the enclosure by the trustees of the internal improvement fund of a portion of Pelican bay, an arm of Lake Okeechobee, and the plan for the reclamation

of the land. "Are these rich, broad acres to be made available to you resident farmers or to be turned over to a corporation?" he asked, and launched into a denunciation of corporations with some obscure references to supreme court judges and contempt of court and possibility of a jail sentence for contempt of court.

David Sholtz, Democratic nominee for governor, is a tool of the Florida Power & Light Company which charges Pahokee 18 cents a kilowatt hour, and his nomination was brought about by a secret committee of five at 10 o'clock Monday morning before the primary election under which 25,000 votes were delivered to him, Howie

The chief political manipulator in the Democratic party is "my friend" Colonel Peter O. Knight of Tampa, corporation lawyer who goes to Tallahassee, at the opening of each session of the Florida legislature, rents a floor of the Cherokee hotel and stays there during the entire session giving or-

Catts was the only governor who ever reduced taxes (applause); he lowered taxes the first year he was in office and then raised them millions of dollars in the last years of his term.

government. He was run out of Mexico by the revolutionists, he said, and his version of his service to the state by expenditures and bringing in buyers was given in detail, with accounts of his conversations with rich men in the north he sought as investors. Lawyers were denounced; it costs \$5,000 for a mortgage foreclosure in Florida

The Glades And Its Affairs

To people who use the country weeklies have more meaning than appears on the surface. For instance, the Okeechobee News says: "J. H. Hendry reports that his fishing crew on Lake Istokopoga is getting good catches but that prices are low. He is clearing land on the south side of the lake to plant a fall and winter crop of vegetables. Hundreds of men quit fishing on Lake Okeechobee and went to farming on East Beach years ago because commercial fishing in inland waters cannot compete with fishing in the salt waters that are so close at hand. Lake Okeechobee should be closed to commercial fishing, and the fishermen who control the politics of Glades and Okeechobee counties are doing a real harm to the whole region by their selfish insistence on keeping the lake open to commercial fishing. All of them would do better to imitate Mr. Hendry's example. The state's administration of the fishing laws on Lake Okeechobee has been to encourage law violation."

Plans to relieve economic conditions in Dade county by placing unemployed persons on farm lands in the Everglades were approved by the county commissioners following an inspection trip up the Florida Turnpike to the locality of the Pennsylvania Sugar Company farm and conference with Ernest R. Graham, manager. The men who made the inspection and held the conference were C. H. Cranford, chairman of the county board; J. E. Lummie, a city commissioner; L. L. Lee, city manager; and Louis McReynolds, chief of the city civil service bureau.

In its issue of January 22, 1925, The Everglades News carried a page article under the heading "The Discovery of the Florida Everglades." The article concluded with this paragraph:

"There was once a man, wise, philosophical, and a traveler, who propounded a theory of colonization to explain why men travel far and dangerously into unknown places and there, in far, hardship, remain and flourish, cultivating the soil, raising stock, harnessing great water, and building towns. This is the theory: 'When a new land is ripe for occupancy Nature beckons with a finger tipped in gold. But in the end it is the land, not the gold, that takes hold of men's imaginations. The gold vanishes into the cliff, the height dust shines no more in the depths of the river, and the traveler and his few look about them for a way to live. Then the land triumphs, the hunter, the trader, the dealer, land, whose promises are fulfilled with the steady march of the seasons.'"

All very true. But farmers up in the Lake region don't like the idea of competitors being subsidized by means from the Reconstruction Finance Corporation. They needn't worry—men who go on farms only because they have no other way to get to go are likely to produce enough to hurt.

George B. Hills is Jacksonville, member of the State Road Department and consulting engineer for Okeechobee Flood Control District, is referred to in "the public prints" as Franklin D. Roosevelt's representative in Florida. So? And when did he get to be that? How? Mr. Hills gets \$8,500 a year salary from the flood control board, not to act as an engineer, but that is forbidden by the law; he gets a resolution of thanks for having arranged to get the State Department to spend money on Lake Okeechobee. The secretary of war, a Republican, Franklin D. Roosevelt is the Democratic nominee for president; Mr. Hills is Roosevelt's representative in Florida. So? Something funny, someone?

It is well to recall that the inauguration of the Lake Okeechobee Flood Control project was the harbinger and flood of 1925 which caused the death of 300 persons and the project was supported by the hurricane and flood of 1925 which caused the death of 300 persons and the project was supported by the hurricane and flood of 1925 which caused the death of 300 persons.

Being on President Hoover's promise, the settlers in the Everglades stuck with the country and did their part; they have rebuilt their homes, enlarged their plantations.

We Are On the Scent Of A Great Industry

Inquiries, with some facetious comment, has come to the office of The News that the publication of the Associated Press dispatch from Savannah, Ga., which stated that applications were made for a license of industrial alcohol control by a rose grower "on the banks of Lake Okeechobee" for the permit to use alcohol in the manufacture of perfume.

"Where is the perfumery factory?" people ask us, and if it is not enough to say, "Don't you smell it?" Fertilizer is just beginning to be distributed and some people's sense of odor is not discriminating.

Since it has been learned that good grain alcohol can be obtained on a permit for use in making perfume there is a live interest in the perfume business. But The News doesn't know where the perfume factory is. May be it is at Moore's factory in the two crops of the 1932-33 season. On a price of \$2.25 per car at terminal markets and an average yield of 100 crates to the acre, there is prospect of the creation of values of over \$100,000 and \$700,000 to the district this season from celery.

There is now being put out seed beds for one field of 160 acres, one of 50 acres, one of 30 acres and one of 30 acres. A grower who will have 15 acres has not made his seed bed yet.

Celery can be grown early and late, over a period of five months, December to June, at least 100 crates to the acre. Celery will be used the second time for late crops.

Deep figures for the contrary crop is being grown in this vicinity for \$180 per acre to harvest, and it is expected that the celery will be under ideal conditions for as little as \$150 per acre.

Certain facts as to celery have been established by the technicians at Pyralis Experiment Station and at the University of Florida and confirmed by individual farmers on tracts from 12 to 20 acres. These are: (1) "The celery is a very expensive fertilizer ingredient, produces no appreciable profit, and is a waste of time and money; (2) that 700 crates per acre is the low average rather than a fantastic hope; (3) that water and soil control can be more economically secured than in any other celery growing section known; (4) that the cultivation of the growing crop to the character and make up of the Glades knock soil in most celery growing sections.

These facts, established in the experience of laboratory study and field work of the experts and ordinary farmers, backed by cost of celery, have been advanced by those actively engaged in the growing of celery to support their claims that it will be produced at a maximum cost of \$180 per acre. H. H. Westcott, of the University of Florida, and C. W. and his relatives in South Carolina.

Tomatoes at Loxahatchee made money last season but beans did not. Mr. Thorpe says he has concluded that individual farming is not a good plan—small production means control of small quantity for sale and makes marketing difficult, so he will join a syndicate which will have large enough production to sell in car load lots. The Loxahatchee citrus development is going well but there are slaves and in fear look about them for a way to live. Then the land triumphs, the hunter, the trader, the dealer, land, whose promises are fulfilled with the steady march of the seasons."

HOT? YES, BUT WORSE UP THERE

Just pull this one (uncertain, tourist or smart alec tramp) out of winter when he says, "Don't get hot here in the summer."

Government reports show temperatures last Saturday: Winneconne, Wis., 96 degrees; Washington, D. C., 96 degrees; Spokane, Wash., 92 degrees; Shreveport, La., 96 degrees; Boise, Idaho, 92 degrees; Abilene, Texas, 100 degrees; Fresno, Cal., 104 degrees; Phoenix, Ariz., 110 degrees.

San Antonio, Texas, 100 degrees. And so on, and so forth. Why, so far as that, the 88 degrees in New York city and the same in Chicago that day, like the 88 degrees at Atlantic City, N. J. is worse than the 88 degrees in the Everglades. Don't let them kid you, kid. Everglades weather is good weather.

ings and increased the facilities for expansion in the future. The big land companies failed, the men left the outside who had projected themselves into an attempt at leadership withdrew and the settlers were left to their own rearing, and they have done very well.

Some bad things have happened. One of these is the fire of the musk mounds, and the trustees of the internal improvement fund and all other land owners should exercise themselves for prevention and control of the fires. Planting of the land to trees will not be a solution—two-thirds of Michigan's original exclusively timber land has been burned over. Impounding waste water on water land is a bad plan.

The best plan? A slash on Broadway... A smash on the screen: See Wheeler and Woolsey in "Girl Crazy" at Prince Theatre Saturday and Sunday.

BELIEVE CELERY A PROFIT CROP

By Luther Jones.

A check-up among farmers, brokers, seedmen and implement dealers is based on an estimate that from 250 to 500 acres of celery will be grown in the Belle Glades section in the two crops of the 1932-33 season. On a price of \$2.25 per car at terminal markets and an average yield of 100 crates to the acre, there is prospect of the creation of values of over \$100,000 and \$700,000 to the district this season from celery.

There is now being put out seed beds for one field of 160 acres, one of 50 acres, one of 30 acres and one of 30 acres. A grower who will have 15 acres has not made his seed bed yet.

Celery can be grown early and late, over a period of five months, December to June, at least 100 crates to the acre. Celery will be used the second time for late crops.

The Loxahatchee citrus development is going well but there are slaves and in fear look about them for a way to live. Then the land triumphs, the hunter, the trader, the dealer, land, whose promises are fulfilled with the steady march of the seasons."

STUCK GROWERS SHOULD SET ONLY VIGOROUS PLANTS

GAINESVILLE, Fla., July 26.—Stuck growers should set only the most vigorous plants, Mr. R. E. Roebeling, horticulturist near Chuluota, Fla., said today. He explained in a radio address, that the best plants are those that are sturdy, healthy, and have a good root system.

Partial shading and thinning of the seedbed were suggested as important factors in growing hardy plants early. Tests made during the last three years show that a partial shade of mulch or cheesecloth on slats will reduce the mid-day soil temperature an average of about 10 degrees to a depth of two inches. Since light and heat are too intense for the early plants, this shading is well worth while.

As soon as the plants have reached a good size they should be thinned, the remaining ones will be pulled out and the others left.

He urged growers to take every precaution in growing their own plants or to secure stock plants from their own stock. The setting of weak, spindling plants or those that are disease-infested is usually a waste of time.

Since light and heat are too intense for the early plants, this shading is well worth while.

SCHOOL TEACHER TAKES WAGE CUT

Salary of the superintendent of public instruction in Okeechobee county was set by the school board of that county at \$150 a month. There is a law that authorizes as high as \$25 a month. The Okeechobee schools will open September 5 for a term of eight months. J. E. Moses, principal of the high school, is to receive \$2,100 annual salary of which the state pays \$1,500, and the assistant principals range from \$75 a month to \$85.

The principal of the grade school in Okeechobee is to receive \$65 a month and other teachers in the grades from \$40 to \$60. Salaries of teachers in the county school range from \$40 to \$60. A teacher in the grade school for transporting pupils from Eagle Bay to Okeechobee, and \$75 a month for transportation from Okeechobee to the school.

Root-knot is a disease caused by minute worms which live on the roots of many of the vegetable and truck crops commonly grown in Florida. These worms, called nematodes, will bore into the root and secrete a poison which causes the root to swell, and the plants to turn yellow and die. Young plants are most susceptible and should be given a free treat in the seedbed.

Newly cleared land is particularly susceptible to root-knot, but sandy land which has been planted to truck crops for several years is also susceptible. The treatment is to apply 600 pounds of sodium cyanide dissolved in water, wetting it down, and then wetting down 600 pounds of ammonium sulphate. The cyanide-acid gas will be formed, and persons should leave the seedbed at once. This treatment is rather expensive, but it leaves the soil rich in nitrogen; this phosphoric acid and potash only need be added for fertilizer. Seed may be planted in 10 days after the soil has been treated, and the government chemicals should be used, while on very sandy types a smaller amount will suffice.

Growing velvet beans or Crotalaria will destroy nematodes, but several months will be required before a loss by carrying off the seed before they sprout. Those in the seed will be killed by hydrogen cyanide, and all soil and water in the seedbed should be treated with sodium cyanide. Form the soil simply pump a hole in the center of the ant hill and pour in a pint cyanide solution, to cover the ground in a few days to catch any new nests. This solution should not come in contact with the roots of valuable plants.

Young, healthy seedlings, which they scraped their way to love! See Norman Foster, June Clyde and Zasu Pitts in "Steady Company" at Prince Theatre, Thursday and Friday.

MUCK FERTILIZER BEST
J. T. Jack, Taylor, Lake Okeechobee pioneer, is shipping muck from Glades county to the John Roebeling estate near Chuluota. Many kinds of fertilizers have been tried but the muck is the most satisfactory. Mr. Taylor now makes his home at Lake Placid.

If you're not keeping "Steady Company" then you better see "Steady Company" with Norman Foster, June Clyde and Zasu Pitts in "Steady Company" at Prince Theatre, Thursday and Friday.

EXPLORES RETURN WITH POTATO BREEDING STOCK

After six months of study and exploration of the original home of the potato in South America, Dr. H. G. MacMillan and C. O. Erismann of the Bureau of Plant Industry, have returned to Washington. The objects of the expedition were to study the wild and also the cultivated types of the potato and relate them to the native habitat with special reference to disease and cold-resistance, and to introduce into the United States types that may carry these resistance factors.

The bureau's explorers visited parts of Chile—especially the important island of Chiloe—Peru and Bolivia, working much of the time at altitudes above 12,000 feet in Peru and Bolivia, studying the potatoes used by the Indians in these high areas. They collected in all 125 different lots of tubers and seed, and also a number of other plants of possible economic or ornamental value. In order to safeguard against introduction of any possible disease or insect pests, the potato material is being grown under strict quarantine until it is certain that it is clean and ready to be turned over to potato breeders.

The expedition is the second for the exploration for and introduction of disease-resistant potato types. The first expedition was to the highlands of Mexico.

Books On Insects, Soil Microbiology
Insects may take the world, beating man in the fight for control, some of the scientists say, and a bean grower who has lost his crop to the white flies may say that it looks as if the scientist was right about it. A book, "The Insect Menace," written by Dr. L. O. Howard, for many years head of the bureau of entomology in the U. S. Department of Agriculture, has just been issued by The Century Company, New York, at \$3.50.

Another important book dealing with a branch of farm knowledge is a new edition of Principles of Soil Microbiology by Dr. Selman A. Waksman, Williams & Wilkins Company, Baltimore, Md., \$10.

Dr. Waksman, member of the staff of New Jersey Agricultural College, visited Everglades Experiment Station three years ago and addressed the Technical Society at Shawnee.

The Dr. Clifford R. Robinson, dentist, who killed himself in Miami last week, was an owner of land in the Everglades, having been an early tract buyer, and used to come out to Canal Point and Belle Glades often when he lived in Lake Worth. He was living in Chicago when he bought the Everglades tract.

OPENS NEW STORE MONDAY, AUG. 30th
From The Everglades News. Opening of the Klorox Seed Company's Pahokee store and warehouse in the neighborhood of Belle Glade road has been set for Saturday, August 30. J. J. Miller, local manager, was informed Tuesday in a communication from Miami City.

There are assurances that all details of construction will be fully completed by that time and all of the stock moved from the location on the lake front road and the new merchandise will be placed in proper position by the 30th.

Wiring and plumbing will be completely installed and a telephone will be ready for use on the opening day.

SCHOOLS COST TOO MUCH
Our cost of state government is high, too high, and should be reduced, but the trouble does not begin or end there. Our cost of local county government is too high, the cost of administering the affairs of the county school systems is too high. Both of these should be reduced in every county of which we have any jurisdiction in the state.—Glades County Democrat.

Court Orders Sale of Bankrupt Firm

Certain of the properties of the bankrupt Clewiston Building Material Company, including land, buildings, plumbing supplies, etc., are for sale under an order of the circuit court. Persons interested are requested to make offers to T. W. Weeks of Moore Haven, the receiver, not later than August 15 and the offers will then be submitted to the court. The Building Material Company was one of the B. G. Dahlberg properties, of which F. L. Williamson was in charge for a while.

HENDRY COUNTY'S TAX DELINQUENCY
The name of the Clewiston Company appears frequently and the name of the Southern Sugar Company occasionally in the list of lands in Hendry county delinquent for taxes as printed in the Clewiston News. Many tracts are described as of ownership by the state's internal improvement fund.

Under the heading "Name of Owner" there may be many tracts described as "Tax of 1850," a form of description that has not been usual.

Date of the Hendry county delinquent tax sale is announced as Monday, September 5, which is a month later than the Palm Beach county delinquent tax sale.

The delinquent tax lists for Caloosahatchee Improvement district and the Hendry county portion of South Florida conservancy district are also being printed in the Clewiston News and the date of sale is the same as for the state and county taxes.

Mrs. Blanche Ridenour left for Shelbyville, Kentucky, her birthplace, and expects to spend the summer there and also at a point in southern Indiana. She will visit in Tennessee and North Carolina on her way home about Sept. 20. Mrs. Ridenour will be joined in Kentucky by her daughter, Mrs. Pauline Van Natta of New York City, who will spend the summer with her. Mrs. Van Natta has been attending a convention of photography in Sandusky, Ohio.

Mrs. and Mrs. J. R. Miller and children returned Friday from a vacation spent at Williston, Fla. His old home, and at Ludlow, Ga. her old home, and around Savannah. A. F. Tatom returned Sunday from a short visit to his home in Lakeland, where he has been clearing and planting a tract of land. He has been clearing and planting a tract of land.

Surprise!... Thrills!... Suspense!... "Roadhouse Murder" at the Prince Theatre, Tuesday and Wednesday.

Mrs. L. M. Gray and her daughter, Mrs. W. H. Meelin and her son, Junior Meelin of Moore Haven, have returned from a six week visit with relatives in points in Tennessee.

CHURCH OF THE NAZARENE Pahoee. Pastors: T. C. Smith and E. R. Grigsby. Sabbath school, 10 a. m. Morning worship, 11 a. m. N. Y. P. S. 7:15 p. m. Evangelistic service, 8 p. m. Rev. E. R. Grigsby is bringing to our stirring messages that are causing sinners to quake under their sins and children of God to inquire the way more perfectly. Single singing every evening. Everybody welcome.

TO PRESERVE CHILDREN This notice is given in Florida State Board of Health Notes: "Take one large grassy field, one-half dozen children, two or three small dogs, a pinch of brook and some pebbles. Mix the children and the dogs with the pebbles and put them in the field, stirring constantly. Pour the brook over the pebbles, sprinkle the field with flowers; spread over it a deep blue sky and bake in the hot sun. Remove brown remove and set over to cool in a bathtub."

A hit on Broadway... A smash on the screen! See Wheeler and Woolsey in "Glad Day" at the Prince Theatre Saturday and Sunday.

AT THE THEATRE

WOOLSEY IN "GIRL CRAZY" If variety is the spice of life, the all-star rollicking comedy "Girl Crazy" which comes to the Prince Theatre Saturday and Sunday is the happily so. It is a rollicking comedy. It offers Irish and melody, romance and action, beauty and atmosphere. In the cast are comedy stars, a child prodigy, Broadway beauties, Hollywood cowboys, Mexican comedians, two-gun men, and a half-dozen villains. The action shifts from city tenements to western dance halls and Mexican ranches to rhythmic dances and tender love scenes. Heading the imposing array of talent are the inimitable Bert Wheeler and Robert Woolsey, who start the film as city slickers and wind up as rough and ready westerners. Eddie Quigan carries the romantic lead of a girl-crazy youth who transforms a respectable cattle ranch into a whoopee dance resort. Mitzie Green, a beautiful Mexican girl, plays a peevish little sister and the romance and beauty bring her head and shoulders above the crowd. Kitty Kelly and Lil Chester. Melodies which are liberally sprinkled throughout the picture are by the composer, George Gerwin, modern music's master. The picture is a real gem in the film which is based upon the Broadway stage success.

"STEADY COMPANY" All the rousing excitement of a "Night" Square Garden, "prize fight" a handsome leading man and one of the prettiest girls in motion pictures! If that does not suffice to stamp "Steady Company" as one of those very rare gems of screen entertainment, there is much more to recommend it. First of all Norman Foster is the mentioned highly pleasing lead-actor, a man of whom it can be said the equally well-acted leading lady. The story sparkles with its originality and the picture is a real gem in the film which is based upon the Broadway stage success.

"ROADHOUSE MURDER" Amazingly different in plot and as exciting as it is great! The "Roadhouse Murder" which opens at the Prince Theatre provides romance with virile entertainment of the spine-tingling variety. Packing more thrills in a reel than the average feature does in seven, the film centers its complicated action about a young newspaper reporter's fantastic gamble with fame and the electric chair. Accompanied by the author's own paper reporter's fantastic gamble with fame and the electric chair. Accompanied by the author's own paper reporter's fantastic gamble with fame and the electric chair.

COMMUNITY GOSSIP

It is said Rube Vann has a new Ford car and it is one of those "Repeat the Eighteenth Amendment" tags. . . . People who are returning from vacations in Georgia say times are hard in that state. Eggs selling for twenty-five cents. . . . If they can have eggs at ten cents a dozen in Georgia why can't they do it here? . . . L. N. Simon of West Palm Beach is leading a movement for lower electric light rates here. He has not secured the rent on his land in Canal Point, so it is said.

There was a "pay" at the mill office Saturday and it helped retail trade a little bit but not much. . . . The sugar company will start putting on more in August. It is rumored. . . . A Canal Point man who expects to be arrested on a liquor charge has already arranged for bond. . . . A farmer who has lake bottom and all stumps south of South Bay wants to start plowing but is afraid that if he goes in, too many crocodiles will follow suit. . . . Gray Boynton at Canal Point expects to have his first beans; he usually does. . . . A solid car usually goes from Belle Glade. . . . The sun pulled the resin out of a pine board at Pahoee, Tuesday. Saturday. That means the sun's rays have reached the peak of hotness. It will start cooling off now. . . . Duck hunting season will start earlier than it did last year but beans are liable to be growing on the ground the ducks used to swim in. . . . Avocados are on sale at ten cents each. Still, there isn't as much northward movement in ten cents worth of avocados as in ten cents worth of eggs. . . . Avocados are supposed to be worth a thousand dollars an acre but tomatoes are high here. . . . Why not raise tomatoes? . . . It has been noticed that when there are mosquitos, there are no flies—that flies and mosquitos don't come at the same time. Why is that?

Year's biggest laugh show comes to town. Wheeler and Woolsey with "Glad Day" at the Prince Theatre, Saturday and Sunday.

FARM DOCTORS---

Farm development is bringing into the pockets of the merchants and business men of the upper Glades many dollars. The farming industry is an important pay roll for this community and it should become far more important in the next few years.

With their weekly pay roll, it is only natural that the farmers of this section should make use of the modern and complete facilities of the Bank of Pahoee. They realize that this bank combines completeness, friendliness and safety.

BANK OF PAHOKEE

COMMERCIAL AND SAVING ACCOUNTS INVITED

ASKS GROWERS TO PRODUCE BIGGER CROP TOMATOES

Agricultural Tariff Body Says This Necessary As Basis of Policy

MUST IMPORT IF NOT ENOUGH GROWN HERE

So Far Tariff Law Has Not Materially Decreased Competition

Florida growers are urged by the Florida Agricultural Tariff Association to increase their production of tomatoes as a means of supplying the American markets and furnishing an argument for a prohibitive tariff against tomatoes from Mexico.

In a bulletin from the Bradenton office of the Agricultural Tariff Association dictated by Arthur Hoadley, field representative, it is said: "It looks like the Florida growers should have a market for 10,000 cars in the coming season. This will push the imports back about 2,000 cars and give the importers to understand that Florida growers mean business and intend to have the American market for American products. Let's get busy and do it."

Figures from the Market News Service of the U. S. Department of Agriculture do not show, however, that the existing tariff has proved effective to lessen imports of tomatoes from Mexico or imports in general. For the 1930-31 season the imports of tomatoes from Mexico amounted to 4,412 cars and the next season imports amounted to 4,593 cars.

What happened was that the peak of the Mexican imports moved from February and March forward into the season—April and May. The peak of imports moved away from the Dade county season to the Lake Okechobee season. The Department of Agriculture reports show 272 cars from Mexico in May 1930, 278 cars in May of 1931 and 1,584 cars in May of 1932.

The Mexican imports dropped off in December, January and February, and the "dip" happens in the coming season, the time for Lake Okechobee tomatoes is mid-winter.

Of the petition filed with the Tariff Commission by restaurant

Attorney and Counselor
at Law
BELLE GLADE, FLA.

owners in California asking for revision downward of the duty on tomatoes, the Agricultural Association bulletin says: "This petition has very little, if any, chance for a hearing, as a new tariff bill will not do it. It is expected that next March and the above case would just run into the writing of a new bill. These things take time and it does not expect it to reach a hearing and only filed for effect on our planting."

BELLE GLADE

The Home Demonstration Club met at the home of Mrs. G. E. Tedder, its president, Thursday afternoon. Mrs. Tedder had decorated the house with cut flowers. Mrs. Edith Barrus talked to the club on several interesting subjects including refrigeration and the making of ice and drinks for the hot day. Care of the refrigerator during hot months was stressed. During a short business session, the club voted to send Mrs. J. M. Morris to Gainesville for five days as a delegate to the course to be given there. A refreshment course was served by the hostess. Mrs. J. M. Morris, Mrs. L. E. Besant, Mrs. W. H. Hooker, Mrs. George Parker, Mrs. Frank Henderson, Mrs. L. Besant, Mrs. Bryant Melndon, Mrs. J. M. Morris, Mrs. Ephraim Morris, Mrs. J. M. Morris, Mrs. L. E. Besant, Mrs. Alice Reed, Mrs. W. W. Miller, Mrs. Edith Barrus, Mrs. G. E. Tedder, and Mrs. Evelyn Long.

Mrs. Maude Thompson gave a picnic party at Indian Mound Wednesday night. The guests included Mr. Harry Gwin, of Miami. Guests included Mr. and Mrs. T. A. Labryer, Mrs. and Mrs. W. W. Miller, Mr. and Mrs. Harry Gwin, Miss Maude Thompson, Burton Gwin and Mr. Gwin.

Mr. and Mrs. C. C. Badger, accompanied by Mrs. W. H. Badger, left this week for a visit of several weeks with relatives in Georgia. Mrs. Morris Holly of West Palm Beach is visiting Mrs. W. R. Hooker at Chosen.

Mr. and Mrs. C. H. Thompson have arrived here from a visit to points in Georgia. They were accompanied by Miss Velma Cassels of Chosen, who will be their house guest for several weeks.

Mrs. Gann and daughter of Palm Beach were visitors in Belle Glade Sunday. Miss Ruth Alexander of Miami opened a two week vacation Bible school for children at the Legion hall Monday morning. The school is held under the auspices of the Belle Glade Community church. The Rev. J. W. Johnson, pastor, and is for children from four to twelve years of age. Miss Alexander is assisted by Mrs. T. A. Labryer, Miss Doris Reid, Miss Margaret Hooker and Miss Grace Reid. All parents are urged to send their children each day from 8:30 to 11 o'clock. Mr. and Mrs. George Davis and daughter Edith motored to Fort Lauderdale Thursday.

INDIAN TOWN

Mrs. Colon Waldron returned recently from a stay in the hospital at Arcadia, where she underwent a surgical operation. Her friends are glad to see her looking well and feeling much better. Mrs. Jack Parker, who until recently lived here but now resides in Stuart, started on a trip to her old home in Georgia with her sister-in-law and little daughter, aged 3 years. The child was taken very ill on the way and Mrs. Parker heard from the doctor that the child had a serious case of appendicitis. There was an immediate operation in a hospital in Georgia and the people at the hospital said that if she had waited 12 hours longer, the little girl would probably not have recovered.

The work that is to start on Indian town road, state highway No. 85, is to begin at the other end, in Okechobee county, about 6 or 8 miles in that county being yet to complete. During a short business session, the club voted to send Mrs. J. M. Morris to Gainesville for five days as a delegate to the course to be given there. A refreshment course was served by the hostess. Mrs. J. M. Morris, Mrs. L. E. Besant, Mrs. W. H. Hooker, Mrs. George Parker, Mrs. Frank Henderson, Mrs. L. Besant, Mrs. Bryant Melndon, Mrs. J. M. Morris, Mrs. Ephraim Morris, Mrs. J. M. Morris, Mrs. L. E. Besant, Mrs. Alice Reed, Mrs. W. W. Miller, Mrs. Edith Barrus, Mrs. G. E. Tedder, and Mrs. Evelyn Long.

There is a 6-0 in the papers about laborers for the Okechobee flood project. It is to be wondered if the persons in charge of the hiring will pursue their usual policy of employing imported labor or drifters and temporary settlers who have no stake in this country and pay no taxes, and ignore the permanent settlers who are paying flood and drainage taxes and who have made this country what it is.

The reason for trouble about collecting taxes in this county has been that the cash for salaries and wages has usually been given to persons who own no property and therefore pay no taxes and the people who own land and are expected to furnish the tax money have no jobs and therefore can't pay their taxes. People in the Indian town section have been paying flood and drainage taxes from the start but of course they will be left out if they don't vigorously take steps to get their share of the jobs.

Mrs. Jessamy Lightsey, sister of Mrs. Waldron, is staying with her till the latter grows able to resume housekeeping.

Rev. Duncan filled his usual appointment here Sunday.

"Hush little editor don't you cry." An editor has to have a thick hide. My goodness, people never would have known about the dirty bunch of lawyer politicians misusing drainage funds if you hadn't dug away and found out about it. All the other newspapers seem to be either too indolent or indifferent to tell us about such things. They had rather devote columns to the "news" about the latest "triangle" murder case.

Sayings of modern great men: "The world will get rid of booze when it gets rid of poverty and cruelty, and satisfied our souls as well as our bodies. Such satisfaction will cure the drink problem, just as it will cure most of the ills of the rest of the world." George Bernard Shaw.

BELLE GLADE

WORK UNDER WAY AT SCHOOL HOUSE

Piling is being driven for the two-room addition to the Belle Glade school house and car loads of sand and gravel have been received. Announcement was made yesterday by Joe Friedheim, president of the Belle Glade Chamber of Commerce, which took the construction contract from last week.

Financing of the construction has not been fully completed because of the inability of the school board to make adequate advances of money but Mr. Friedheim is confident that money will be made available as construction progresses.

With the certainty of increase in enrollment and the near approach of the opening of schools, the construction of the addition is a matter of high importance.

HOWIE ATTACKS SHOLTZ AS TOOL OF CORPORATION

Continued from Page One

When the same service can be had from lawyers in Republican states for \$250, the extortion in Florida being due to the control of the legislature by lawyers. He denied that the tax on gasoline and motor vehicles could be reduced and schools maintained. But he had a plan that would erect savings of millions of dollars and his plan would be given to the public in the keynote speech he would make at Sanford on Labor Day.

And the audience "et up" it. Howie's speech was ended with his "Goodbye". The meeting closed with W. H. Marshall's discussion of how the tariff on vegetables was obtained, constituting an attack on the non-partisan Florida Agricultural Tariff Association which has headquarters at Bradenton.

SOUTH BAY

Mrs. Adeline Heinrich and Beatrice Denton were dinner guests of the Willis girls Thursday afternoon.

An impromptu bridge party was enjoyed at the Willis home Friday night. Three tables were in play. Those present were: Betty Willis, Mrs. Adeline Heinrich, Alice Willis, Genevieve Brown, Alice Willis, Myra Nell Kennedy, Mr. E. E. Forbes, Roy Boots, Jack Forbes, Ernest Van Landingham, Beatrice Denton and Everett Forbes.

Mrs. Mary L. Farnum and Mr. and Mrs. M. P. Gay and son Murray returned from Tallahassee Sunday where Mrs. Gay attended summer school.

Louis Baker and family, who have been occupying the Farnum home in their absence, will move to Belle Glade soon.

Edith Willis was a week end visitor in West Palm Beach this week.

Swimming at Clewiston was enjoyed Saturday by Mr. and Mrs. W. H. Rawie, Mr. and Mrs. M. J. Hardy, Myra Nell Kennedy, Betty Rawie and Betty Willis.

Mrs. O. V. Elliott a former resident of South Bay, quietly passed away last week.

A telephone is being installed in the school house here.

A fire in Shaw's restaurant last week caused some excitement here but apparently did not serious damage.

Mrs. and Mrs. W. C. Allen and family motored to Miami last week.

Leon Reddick and Mr. Cannon of Avon Park were dinner guests at the H. C. Willis home Sunday.

ABOUT PEOPLE

Fred E. Flinders of Moore Haven, in charge of surveys on Lake Okechobee for the government, makes frequent visits to Canal Point while tests are being made of the formation of the lake bottom on the route of the channel between Bacon Point and St. Lucie canal.

Carl E. Page of LaBelle, who was principal of the Moore Haven high school a few years ago, has been employed as principal of the Glades county high school for the coming term. Mrs. Harry Delaney, formerly Miss Irma Magill, is another LaBelle teacher employed for the Moore Haven school.

Dr. J. W. Ezelle of Clewiston and Miss Jayme Williams of Angerous, Ga., were married at the bride's home last week. They will live in Clewiston.

Curry Simmons has taken over the agency at Okechobee for the Texas Oil Company.

The Bare Beach school is to be taught by Mr. Amos Whidden. Bare Beach is on the northwest side of Lake Okechobee, in the Lakeport territory.

Are your nerves about to snap?

In these days, worry and overwork sandwiched between hours of pleasure, are leaving our nerves threadbare. A little extra grain and they may snap.

One sure way of lessening this tension is by lessening household labors. In the complete electric home, electric cookery saves cooking time and cleaning time, and the results are always

certain; electric water heating stops worry over open flames and automatic control prevents overheating; electric refrigeration protects the family's health and makes marketing easier; proper lighting and the many small electric appliances do much to protect health, lighten labor and make the home a better place in which to live.

If your nerves are about to snap, ask any of our employees or your favorite electric dealer how your new Thrifty Three electric rate can lessen the tension by bringing you a complete electric service at a cost you can afford.

ELECTRICITY IS YOUR CHEAPEST SERVANT... USE IT!
